How to Install Shareaholic Analytics on Blogger

Step 1

First, go to <u>www.shareaholic.com/publishers/analytics</u>. At the bottom of the page, you'll see an orange box with code in it. Keep this tab of your browser open—you'll need to copy and paste this code into your website in Step 6.

<u>Step 2</u>

In a new tab on your browser, open up your blog's dashboard. On your blog's home page, click on the double-page icon next the orange icon with a pencil, and then select "Template."

On the Template page, select "Edit HTML" under the "Live on Blog" screenshot.

<u>Step 4</u>

	Shareaholic's Test Blog · Template		
New post	Start with a base tempt Live on Blog	Template > Edit HTML	
Posts	shareal		
Comments Google+ & Stats		Directly editing HTML may affect the way some features work and is only recommended for advanced users. Editing temptate HTML may unpredictably affect other Biogger features. We recommend using the Temptate Designer first, where you can Add CSS under the Advanced section.	
Earrings		Proceed Open Template Designer Cancel	
J Settings			
		Close Clear-odita Provine Serve Longitute	

When this window pops up with a warning, click "Proceed." Don't worry about messing any code up—I'll be walking you through the rest step-by-step.

<u>Step 5</u>

When the HTML code pops up, type "Control+F" if you're on a PC or "Command+F" to open the search function on your browser. Type in "/head" so you can find where you need to paste the code. You'll see "/head" highlighted in the code itself in orange as well.

<u>Step 6</u>

Switch back to <u>your tab from Step 1</u> that has the code for Analytics. Copy the code at the bottom of the page. Right above the "</head>" HTML tag, paste the code you copied from our website.

<u>Step 7</u>

Once you've pasted the code above the "</head>" HTML tag, click "Save Template." That's all you need to do on your blog!
